

Semantically-Annotated New Testament (SemANT)

The SemANT Project is an ambitious vision to translate the New Testament into a formal meaning representation language based on open Internet standards, producing a sharable resource that supports automated processing and integration with other resources.

[The Vision of a Semantic New Testament \(from Blogos\)](#) lays out the "big picture".

You can view [Frequently Asked Questions](#) (or imagined ones) about the SemANT Project
[New Testament Names](#) is the first concrete step toward building the infrastructure for SemANT.
